

# What you should know about YaST

---

Duncan Mac-Vicar P. <dmacvicar@suse.de>  
Team Leader, YaST

**Novell.**

# What does people know?

---

- Most complete and popular system configuration tool
- It has graphical and text mode interfaces
- It does lot of magic

# NO user interface for me!!

---

# Enter YaST command line

---

List modules:

- `yast -l`

Use them:

- `yast firewall help`
- `yast firewall startup help`
- `yast firewall startup show`
- `yast firewall startup atboot`
- `yast firewall services add tcpport=666 zone=EXT`

“I don't want to learn YCP!”

# YaST from ruby

---

```
require 'yast'  
require 'ycp/storage'  
  
puts YCP::Storage.methods  
  
dp = YCP::Storage::GetDiskPartition("/dev/sda1")  
dp.each do | key, value |  
  puts "#{key} #{value}"  
end
```

# Why not Python?

---

from ycp import \*

<http://svn.opensuse.org/svn/yast/trunk/mysql-server>

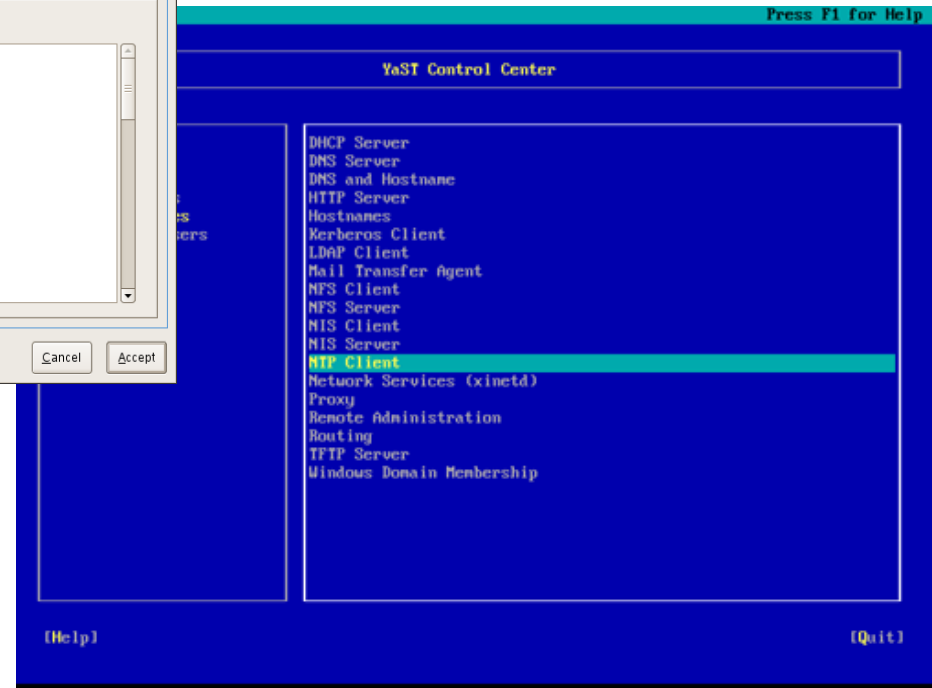

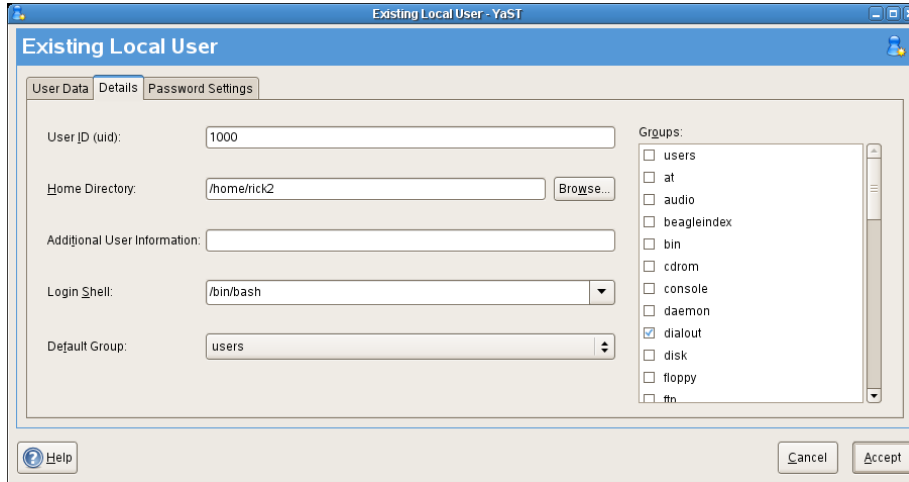

**Need involvement from the community here!**

# The YaST user interface

# YaST UI library

# libyui library

```
// Trivial libyui example.
//
// Compile with:
//
//      g++ -I/usr/include/YaST2/yui -lyui HelloWorld.cc -o HelloWorld
#include "YUI.h"
#include "YWidgetFactory.h"
#include "YDialog.h"
#include "YLayoutBox.h"
#include "YEvent.h"
int main( int argc, char **argv )
{
    YDialog      * dialog = YUI::widgetFactory()->createPopupDialog();
    YLayoutBox * vbox    = YUI::widgetFactory()->createVBox( dialog );
    YUI::widgetFactory()->createLabel      ( vbox, "Hello, World!" );
    YUI::widgetFactory()->createPushButton( vbox, "&OK" );

    YEvent * event = dialog->waitForEvent();
    delete event;
    dialog->destroy();
}
```

### Powerful Multimedia

Multimedia sucks. Patent encumbered codecs you can't find. 3rd party repositories that are never up to date to what you're running. Until now.

Presenting a brand new innovation from openSUSE labs: singing. Every time you wake up and take a shower, sing a tune of your own choice! Singing revitalises your senses enabling you to hack all day in complete silence or in case of most PCs, in a hypnotizing hum of your CPU fan.

### Want More?

Sorry, that's about it.

# Style managed in CSS

---

wizard/style.qss in yast2-theme-openSUSE (or Y2STYLE)

```
#wizard {  
  /* background: transparent url(gilose.png) no-repeat top left; */  
}  
#work_area {  
  padding: 1em;  
  border: none;  
  border-left: 2px solid #888;  
}  
#steps {  
  padding: 3.5em 0 1em 1em;  
  background: url(logo.png) no-repeat top left;  
  border: none;  
  font-size: 90%;  
}
```

“Package management is  
slow...”

## 10.3, 23 repos

---

# zypper in nautilus

**( > 1 minute, cold )**

The following package is going to be upgraded:

python

The following NEW packages are going to be installed:

gnome2-user-docs gnome-menus gnome-desktop eel nautilus

Overall download size: 16.3 M. After the operation, additional 53.3 M will be used.

Continue? [yes/no]: n

# 11.0, 23 repos

---

# zypper in nautilus

**9 seconds, cold. ( 3.5 warm )**

The following package is going to be upgraded:

python

The following NEW packages are going to be installed:

gnome2-user-docs gnome-menus gnome-desktop eel nautilus

Overall download size: 16.3 M. After the operation, additional 53.3 M will be used.

Continue? [yes/no]: n

# 11.0, other goodies

---

- YaST support to manage repository keys
- The solver is simpler and smarter
- Downloading solv files from the server
  - no need to parse locally
- PackageKit backend ( see [packagekit.org](http://packagekit.org) )
  - Will open the door for 1:1 integration between desktop and software management

Why is it so fast?  
Stay here and watch Michael  
Schroeder's talk.

# Corporate color palette and margins

These gray lines show the margins that need to be adhered to. If your slide content extends beyond the margins you may need to move to a full screen slide layout.

Most importantly keep the area under the logo clear
